

Knokke Hippique is riding high in the saddle thanks to Citymesh

STRESS FREE, RELIABLE AND POWERFUL INTERNET

With its enchanting atmosphere, Knokke Hippique welcomes the world's best riders every year. The five-star event is the highest attainable level in jumping and combines top-level sports with exclusive facilities. The unique spectacle is therefore more than an event, it is an unforgettable experience.

STRESS FREE, FROM START TO FINISH

The Stephex Group is the worldwide market leader in the construction and production of horse trucks. The constant pursuit of perfection and progress ensures that, just like their horses and riders, the Stephex events are among the best in the industry. An installation from start to finish with an eye for detail is exactly what Citymesh stands for.

"We were looking for a cooperation partner for our event. A joint acquaintance told us about Citymesh's professional approach. We immediately established contact and the collaboration went smoothly right away," says David Delestrée, Director of Stephex Group. Due to the reliable network, the organization can deal with its own activities without any concerns and a stress-free event is guaranteed.

AN UNFORGETTABLE VIP EXPERIENCE

Experience is central during the events Knokke Hippique and Stephex Masters. The organization succeeds in making equestrian sports accessible and attractive to both younger and older audiences. The atmosphere that is created, with quality above all else, ensures that everyone can fully enjoy the shows, a delicious lunch, a drink or one of the many entertainment venues.

"At an important event like Knokke Hippique, we cannot afford a network failure. This collaboration includes a well-functioning, powerful network and is provided with on-site technical support. The added value of this collaboration? That we have a supplier we can rely on," says David Delestrée, Director of Stephex Group.

"This enchanting atmosphere does not just happen," explains David Delestrée. "It is the cohesion between many qualitative cooperation partners that makes the event such a success. Citymesh is also part of this. The many years of cooperation ensures that we know each other through and through and that quality and flexibility are of paramount importance."

By paying attention to these details and focusing on sustainable partnerships, Knokke Hippique has continued to grow in recent years. The event is thus one of the most famous equestrian events in the world.

TECHNICAL SUPPORT

A robust network is crucial for a fantastic experience.

David Delestrée agrees: “At an important event like Knokke Hippique, we cannot afford a network failure. This collaboration includes a well-functioning, powerful network and is provided with on-site technical support. The added value of this collaboration? That we have a supplier we can rely on.”

“The combination of the right product and excellent service ensures a good, pleasant cooperation,” says David Delestrée. “Citymesh is quite brilliant at both, we can only recommend such a collaboration”.
